

About Tavaero Jet Charter...

In an industry replete with aircraft and pilots, Tavaero Jet Charter stresses that, in reality, we are not in the transportation business as much as the service business. We pride ourselves on maintaining an organization that focuses on TEAM (tradition, experience, attitude and motivation) effort.

Our Dispatchers are available 24 hours a day to provide a quote, schedule trips and assist with ground transportation, catering requests and hotel accommodations. Our pilots maintain constant communication with our dispatchers which allows us to relay any messages you may have for your passengers, whether in the air or on the ground.

Tavaero Jet Charter's Safety record is indicative of the effort expended by the company to train each pilot and mechanic. Our unblemished record is an accomplishment we preserve by continuously cross training all company personnel. Verification of a safety record that is clear of any violations and/or accidents is the easiest method of assuring that you have selected a reputable aircraft charter company. This foundation serves as a catalyst to maintain above average training for pilots.

Our pilots undergo extensive annual training through FlightSafety International and/or CAE Simuflite two highly prestigious, FAA-approved simulator-based training facilities. Additional in-house training is provided on a monthly basis to address updates on equipment and procedures within the aviation industry.

Tavaero Jet Charter's Mechanics are dedicated to working exclusively on TJC aircraft. This affords Tavaero personnel a much better knowledge of each individual aircraft. All our mechanics have an Airframe and Powerplant (A&P) license that can only be obtained through extensive instruction at an accredited maintenance school. They also attend manufacturer's recurrent training annually to stay current on all our equipment.

Additionally, our Director of Maintenance holds a coveted Inspector Authorization (IA) license, authorizing him to perform major repairs and maintenance on our fleet of Aircraft. The IA license requires annual re-certification by the Federal Aviation Administration.

In light of the recent transportation-related security concerns, Tavaero Jet Charter is acutely aware of the safety and concerns of our passengers. In an effort to maximize Security, Tavaero welcomes evaluations by aviation-specific auditing companies to demonstrate our willingness to be better than just minimum requirements. We've been evaluated by ARG/US and have received a Gold classification review. We've also recently passed the stringent and scrutinizing Wyvern Ltd. Charter operation audit.

In our endeavor to exceed the standard required by the FAA, Tavaero Jet Charter promotes Continuing Education for all company personnel. Tavaero Jet Charter mechanics attend manufacturer seminars and conventions in order to remain informed about state-of-the-art technology, products and services. Dispatchers are also encouraged to attend conventions and seminars sponsored by aviation organizations such as National Business Aircraft Association and National Air Transportation Association, so they can keep abreast of the latest information regarding software, legal issues, and FBO's, among other issues.

TEAM Tavaero pride ourselves in our service and safety reputation in the industry. Let us show you first hand how we can assist you. Let our **TEAM** of experts handle your next flight or aircraft acquisition.
