

# Executive Summary

---

In an industry replete with aircraft and pilots, Tavaero Jet Charter stresses that, in reality, we are not in the transportation business as much as the service business. We pride ourselves on maintaining an organization that focuses on professionalism, safety and first class service. Our philosophy reminds everyone in our organization that it takes a TEAM effort to assure success at every level.

It is the dedication to excel in our industry that allows us to proudly and graciously announce that we have many Fortune 100 and 500 companies that rely on Tavaero Jet Charter for their jet transportation needs. Throughout the organization, individuals know that there is little emphasis on the traditional definition of “job descriptions”. From upper management to pilots, dispatchers, mechanics and aircraft cleaners...our job description is to make each flight a success.

The Tavaero Jet Charter diversified fleet gives us the option of offering our customers an aircraft best suited for the particular trip.

We sincerely appreciate the confidence and trust that our customers have in our organization. We assure you that this empowerment is not misplaced and that our service only gets better every year.

We hope that the following info will give you an overview of our entire organization from the obvious to the more transparent components that make us a well respected charter operation not only in Houston, Texas but within our industry, nationwide.

We would appreciate the opportunity to present our services and answer any questions you may have, at your convenience.
